

Workshop 4: Why (not) to avoid teaching hands-on Enterprise Systems: State of the art experiences in Scandinavia

Johan Magnusson and Tero Päivarinta

DESCRIPTION: Several universities have during the last couple of years had interesting experiences from introducing enterprise systems into the curriculum. The workshop will involve a number of examples from different universities with foci ranging from business to informatics. The aim of the workshop is to create an overview of the current state of enterprise systems usage within Scandinavian academic education and share experiences in order to chart a possible road ahead. The results from the workshop will be collected for an intended forthcoming publication.

ORGANIZERS: Scandinavian Academic Network for Teaching Enterprise Systems Centre for Business Solutions, School of Business, Economics and Law, University of Gothenburg Centre for Enterprise Systems, University of Agder Royal Institute of Technology Umeå School of Business and Economics, Umeå University
